

TRADE MARK POLICY

Use of Aapai Trademarks

You must carefully consider AT trademark policy when mentioning AT offerings in your materials or in connection with your own products or product names. You must always make a clear and unambiguous distinction between your own solutions, products, and/or services and the AT offerings mentioned.

AT/AAPAI accepts no responsibility for any violation of legal regulations regarding competition or trademarks by partners. In addition to these guidelines, country-specific regulations may apply.

Proper Use of Trademarks

Unregistered or pending trademarks bear the ™ symbol. Registered trademarks carry the ® symbol. A selection of AAPAI trademarks, both registered and pending, as well as a selection of AAPAI offering names, are listed in this site. Please use these names and their symbols according to the guidelines that follow.

The only use that does not require the symbols is a Web application or other presentation where the low resolution of the medium renders the symbol illegible. However, in such case please attribute AT/AAPAI trademarks used in this fashion on the attribution page of the application or presentation in accordance with the "Trademark Attribution" section of the guidelines.

To ensure correct use of trademarks, follow these suggestions:

- Always refer to a trademark using the correct spelling and correct capitalisation. Do not alter the trademark in any way.
- Always use a trademark as a proper adjective, not a noun.
- Use a trademark as a proper adjective followed by a common noun descriptor.
- Include the appropriate symbol - ™ or ® - representing the trademark status.
- The registered trademark on "AT" applies to all goods or services delivered by Aarnav Technologies - anything you can obtain from AT.
- Do not use a trademark in possessive form.
- Do not use a trademark in plural form.
- When referring to the AT corporate entity rather than the AT brand, trademark rules do not apply.
- The entire name "Aarnav Technologies" is a trademark of Aapai Technologies Limited.

- Always use a descriptor after "AT."
- Do not use the ® symbol in industry offering names, such as "AT for Automotive, unless there is no other opportunity to use the ® symbol after "AT" within the written piece.

Trademark Attribution

In any material that mentions any AT trademark, you must include the correct attribution statement based on the following:

"<AT TRADEMARKS> is/are the trademark(s) or registered trademark(s) of Aapai Technologies in Japan and in other countries."

If you have questions regarding trademarks and/or logo usage, please contact legal@aarnavtechnologies.com.
